Profile summary

SDET / Senior Software Engineer with 5 years of experience in software testing, quality assurance, automation, and manual testing within the Banking and Financial Services sector. Expertise includes Java, Selenium WebDriver, Serenity BDD, Cucumber, TestNG, JUnit, REST Assured, and Postman. Skilled in designing scalable BDD automation frameworks utilizing Page Object Model, reusable step definitions, dynamic XPath, and data-driven testing. Proficient in functional, regression, integration, and end-to-end testing, defect management, and risk-based testing. Familiar with Agile/Scrum methodologies, SDLC, STLC, CI/CD pipelines, Jenkins, and Git. Holds Microsoft certifications AZ-900, AI-900, and AZ-204.

Skills

Serenity BDD | Selenium WebDriver | Cucumber BDD | TestNG | REST Assured | Postman | Java | JavaScript | Jenkins | Git / GitHub | Maven | GitLab CI/CD | Cypress | Playwright | Manual Testing | Functional Testing | Regression Testing | Defect Life Cycle | Smoke Testing | Sanity testing | Generative Ai Tools | Github Copilot | JIRA | Automation Testing | Mobile Testing | POM | Page Object Model

Certifications

- Agile Software Development Coursera
- Microsoft Certified Azure Fundamentals
- Microsoft Certified: Azure AI Fundamentals
- Microsoft Certified: Azure Developer Associate (Valid upto November 2026)
- Salesforce Certified Agentforce Specialist

Work Experience

Senior Software Engineer — Capgemini **Sep 2021 - Present**

- Directed the design, development, and maintenance of resilient automation frameworks using Serenity BDD and Java to enhance testing reliability.
- Improved UI and API test automation, significantly increasing test coverage and optimizing execution efficiency across diverse projects.
- Created detailed automated test scenarios for UI and API using Cucumber, TestNG, and REST Assured to validate key business workflows effectively.
- Conducted functional, regression, smoke, and sanity testing while validating backend data accuracy through advanced SQL queries.
- Integrated automation suites with GitLab CI/CD and Jenkins, enabling streamlined continuous integration and automated test execution in deployment pipelines.
- Developed and implemented data-driven automation frameworks supporting Agile sprint cycles and user acceptance testing (UAT) processes.
- Delivered comprehensive end-to-end automation and API validation solutions across Fleet Management, Retail Banking, and Union Bank domains.

Education

B.Tech / B.E. | Mechanical Engineering **2019**
R.C. Patel Institute of Technology

Achievements

Certifications & Training

Completed multiple certifications including Microsoft Azure (Fundamentals, AI Fundamentals, Azure Developer Associate), Salesforce Certified Agentforce Specialist, and Agile Software Development (Coursera).
